Objectives

To be able to join the front line of software developers that directly contributes to the progression of technology and to further my knowledge in the art of programming.

Work History

Senior Software Engineer, CoInspectApp (Dec 2015 - Dec 2018) www.coinspectapp.com

Developed the flagship product, features, and reports for both the frontend and backend as part of a team six. I was involved in the planning and design of application. I have also developed multiple internal tools that either sped development time or made deployment easier.

Strengths and achievements:

- Experience in software engineering and full stack development
- Experience in Node, Angular, AWS and Postgres
- Work well in teams and alone. Also able to assist with technical planning
- Lead the team that landed us a contract with the National Center for Healthy Housing (NCHH)
- Have some experience with business intelligence tools like Tableau
- Significantly increase performance of a number of heavy queries us

Team Lead, Go Virtual Assistants (2014 - 2015) www.go-va.com.au

Build websites for multiple clients and a few internal tools. Trained the interns and juniors. Generally oversaw projects.

Strengths and Achievements:

- Develop in PHP, JS on wordpress
- Stand-in devops
- Have experience in meeting with clients and extracting requirements

Software Engineer, Dreamline Productions (2012 - 2014) http://www.dreamlinepro.com/

Develop Wordpress website for multiple Japanese clients. Developed custom themes and plugins.

Strength and achievements

- Experienced in Wordpress theme and plugin development
- Fix multiple bugs and updated legacy systems in PHP

Education

University of San Carlos   BSICT Information Communication Technology   June 2009 - March 2014

Interests

I am a down to earth person and I enjoy software engineering, researching and learning new things.

On my off days I enjoy reading books, playing video games or working on my pet projects.
